

SEMINARIOS IRYCIS 2025

Retos de la Investigación en Oncología Médica desde la perspectiva clínica

Pilar Garrido López

Cáncer

13 FEBRERO 2025 10:00h

Aula Maxi Lozano (Planta 7 Dcha) y on line (Zoom)

Pilar Garrido is a medical oncologist, associate Professor of Medical Oncology at Universidad de Alcalá, and Head of the Medical Oncology Department at the University Hospital Ramón y Cajal in Madrid, Spain. Responsible for the thoracic tumors research unit at Ramón y Cajal Research Institute (IRYCIS), she is leading a translational program in collaboration with other clinical and experimental biology cancer groups with a particular interest in multimodality management, predictive biomarkers, immunotherapy and new anticancer agents in lung cancer. Dr. Garrido is also actively involved in many phase I-III lung cancer clinical trials in that field. Former president of the Spanish Federation of Medical Societies (FACME) and the Spanish Medical Oncology Society (SEOM), she participates in various national scientific committees and is engaged with Spanish National Political and Administrative Institutions. ESMO Faculty for lung and other thoracic tumors, associate editor of Annals of Oncology, former member of the ESMO Council and former chair of the Women for Oncology Committee, she also served as a member of the ESMO Fellowship Committee, Press and Media Affairs Committee, and the Leadership Generation Task Force. Highly involved with patients' associations, she is the Chief Medical Officer of the AECC (Spanish Against Cancer Research Foundation), where she also sits on the Board. She is also a scientific committee member of the Spanish Association of Lung Cancer Patients (AeCAP) and Propatients association.
